Sahibzada Ajit Singh Nagar, Punjab, India

PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on industry experience through a summer internship at Telecommunications Consultants India Ltd. Strong foundation in Data Structures & Algorithms, C, C++, Python, and Machine Learning, combined with practical skills in Requirements Analysis and data manipulation using Pandas. Demonstrated ability to apply analytical thinking to real-world problems and quickly learn new technologies. Seeking a Software Engineering role to contribute to high-impact, large-scale systems.

EXPERIENCE

Telecommunications Consultants India Ltd. (TCIL)

Chandigarh, India

Summer Intern

May 2026 – July 2026

- Conducted requirements analysis for [add project/module name] to translate business needs into clear technical specifications
- Utilized Python and Pandas to [clean/analyze/process] datasets, improving [data accuracy/reporting efficiency] by [add metric]
- Collaborated with cross-functional teams to support [add specific deliverable], gaining exposure to enterprise-scale telecom systems
- Applied problem-solving and analytical skills to identify and document [specific issue/improvement], contributing to [outcome]

EDUCATION

Chandigarh Engineering College

Chandigarh, India

Bachelor of Technology in Information Technology

July 2024 – July 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Database Management Systems, Operating Systems
- Current GPA/Percentage: [Add your current academic performance]

M.L.T. College

Saharsa, India

Intermediate (Class XII)

April 2022 – April 2024

TECHNICAL SKILLS

Programming Languages: C, C++, Python, SQL

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOP), Requirements Analysis, Problem Solving

Machine Learning: Supervised/Unsupervised Learning, Model Evaluation, Pandas, NumPy, Scikit-learn

Databases: MySQL, PostgreSQL, SQLite

Developer Tools: Git, GitHub, VS Code, Linux/Unix

Languages: English (Professional Working), Hindi (Full Professional)

Soft Skills: Analytical Thinking, Team Collaboration, Quick Learner, Attention to Detail

PROJECTS

Movie Recommendation System | Python, Machine Learning, Pandas

[Month Year]

- Developed a Machine Learning-based Movie Recommendation System that suggests movies based on user preferences and movie similarity
- Implemented a content-based recommendation approach using movie features (genre, cast, keywords) to identify and recommend similar titles
- Used Python and Pandas for data preprocessing, cleaning, and analysis to prepare the movie dataset for similarity computation
- Applied data-driven similarity analysis techniques to deliver relevant, personalized recommendations

[Project Name 2] | C++, Data Structures, Algorithms

[Month Year]

- Developed [describe what you built] demonstrating proficiency in [specific DS/Algo concepts]
- Optimized [specific aspect] achieving [performance metric, e.g., 40% faster execution time]

ACHIEVEMENTS & ACTIVITIES

Competitive Programming

Ongoing

- Active on [LeetCode/Codeforces/CodeChef] with [X problems solved / rating achieved]
- Participated in [hackathons/coding competitions] achieving [specific placement/recognition]

Academic & Leadership

- [Add any academic achievements, awards, scholarships, or leadership positions]
- [Technical club memberships, volunteer work, or relevant extracurriculars]

CERTIFICATIONS & LEARNING

[Add any online courses or certifications - e.g., Machine Learning (Coursera/Andrew Ng), Python for Data Science, SQL certifications, etc.]
